DDM371SIL	PDW Silencer Pack .300 BLK	BM779	B	.300 BLK	11	5/8 x 24	17	Carbine cat. B	4160.00 € incl. tax

Daniel Defense compact pack in .300 BLK with integrated sound moderator.

This pack combines a **Daniel Defense PDW .300 Blackout caliber rifle** and a dedicated silencer, for a compact and high-quality category B solution.

- **caliber:** .300 AAC Blackout
- **barrel length:** 7 inches (17 cm)
- **no scratch:** 1:7
- **stock:** Maxim Defense CQB folding stock
- **rail:** Omega M-Lok
- **coating:** Cerakote black anodized
- **magazine:** 10 shots
- **accessories included:** 5x8/24 .300 BLK dual flow silencer, polymer case
- **Origin:** Made in USA

Compactness and ergonomics

The **Daniel Defense PDW rifle** features an ultra-short design with a 7-inch barrel and Maxim Defense CQB folding stock. This design makes it easy to carry and is ideal for confined shooting environments like the TSV.

.300 AAC Blackout Caliber

Designed to work effectively with a **suppressor**, the .300 BLK caliber offers two usage profiles: subsonic, quiet, regular ammunition, and supersonic ammunition for a tighter trajectory at short and medium ranges.

Double flow silencer

This pack includes a .300 BLK dual-flow 5x8/24 silencer. Unlike conventional silencers, it uses two separate internal circuits to manage the gases:

- **first flow:** immediately reduces pressure and detonation at the exit of the barrel,
- **second flow:** gradually dissipates another part of the gases into additional chambers.

This process provides a double advantage: optimized sound reduction, particularly with subsonic ammunition, and reduced back pressure, limiting the return of gas towards the shooter and preserving the reliability of the semi-automatic weapon.

Robust design

The essential parts are machined from 7075-T6 aluminum to Mil-Spec standards, ensuring strength and durability. The barrel is cold-hammered, chrome-plated, and phosphated for increased strength and lasting accuracy.

Technologies and processes

- **cold hammered forged barrel:** process which densifies the material and extends the life of the barrel.
- **7075-T6 aluminum:** aeronautical alloy renowned for its lightness and mechanical strength.
- **Cerakote coating:** surface treatment providing enhanced protection against wear and corrosion.
- **MPI and high pressure testing:** quality controls that guarantee the reliability of each part subjected to high stress.

Accessories and customization

The Omega rail with M-Lok interface makes it easy to add accessories like a foregrip, light, or optic. The weapon comes without a red dot or light, giving the shooter the freedom to configure their kit.
