SLSA001	Reducteur de son RDS 300BLK pour PDW double flux cal.30 LSA	Vente libre	.300 BLK	5/8 x 24	1 114.00 € incl. tax

Sound reducer optimized for the .300 Blackout caliber.

This .300 Blackout **dual-flow silencer** is designed to effectively reduce the sound signature while maintaining the reliability of semi-automatic rifles.

- **caliber:** .300 AAC Blackout
- **technology:** double flow
- **thread:** 5/8x24
- **Compatibility:** Subsonic and supersonic munitions
- **use:** sport shooting category B

Dual flow technology

A **dual-flow silencer** uses two separate internal circuits. The first immediately reduces gas pressure as it exits the barrel, while the second circulates it through additional chambers for gradual dissipation. This system limits noise and reduces gas blowback toward the shooter.

Advantages in sport shooting

In category B, the .300 Blackout caliber is particularly popular with a sound moderator. Combined with this device, it allows for discreet and regular subsonic firing, while remaining compatible with supersonic ammunition for more focused firing.

Compatibility and assembly

The standard 5/8x24 thread allows direct mounting on most **AR15 rifles chambered in .300 BLK** . The suppressor maintains the weapon's compactness and remains compatible with common handguards.

Materials and reliability

Made from heat-treated steel and heat-resistant alloys, this suppressor withstands sustained rates of fire. Its robust design extends the weapon's lifespan and improves long-term shooting comfort.
