22LR

SKU	Designation	RGA	French Law	Caliber	Shots	Thread	Barrel (cm)	Length (cm)	Weight (g)	MSRP
GMA0072	Wooden stock	CG754	B	.22 LR	11	Without thread	11.4	19	750	479.00 € incl. tax

Handy and precise pistol, with shaped wooden grips for optimal grip.

The **MAUSER PP7 in .22LR** focuses on ergonomics and precision, with a careful finish centered on its wooden grips.

- **brand:** MAUSER
- **model:** PP7
- **caliber:** .22LR
- **capacity:** 10 shots
- **barrel length:** 11.43 cm
- **total length:** 19 cm
- **weight:** 750 g
- **pads:** Ergonomic wood
- **warranty:** 2 years

Wooden plates

The **wooden scales** are the distinctive feature of this model: they provide a natural support surface, good thermal insulation, and an aesthetic finish. When properly adjusted, they improve grip repeatability and contribute to greater stability when aiming.

Rifled barrel

A **rifled barrel** has helical grooves inside the barrel that impart spin to the bullet. This spin stabilizes trajectory and increases accuracy, a notable advantage for the **.22LR** caliber at ranges.

.22LR

The **.22LR** is an economical, low-recoil rimfire cartridge. It allows for large training rounds at a low cost while providing accuracy suitable for learning and recreational shooting.

Steel frame

The use of a **steel** structure ensures rigidity and longevity. Steel is more resistant to mechanical wear and facilitates regular maintenance, ensuring consistent performance over time.

Safety and ergonomics.

The .22LR Mauser PP7 pistol is equipped with an **ambidextrous safety catch** on the slide as well as a **decocking lever** on the left side of the pistol. When the hammer is cocked, the decocking action will bring the hammer to the **half-cock position**. Decocking allows the weapon to be on safety while still having a cartridge chambered.

Fixed sight

The **fixed sight** is simple, robust, and suitable for recreational shooting. It does not offer fine adjustments but limits the risk of misalignment during regular use.

Maintenance and recommendations

Maintain the barrel and moving parts after each shooting session to maintain accuracy. Protect the wooden grips with a light oil or wax suitable for wood; avoid harsh products. Use quality .22LR ammunition to ensure reliable feeding and limited wear.

- **barrel type:** Rifled
- **threaded barrel:** No
- **Sight type:** Fixed sight
- **carcass:** Steel
- **use:** recreational shooting, training
