Versatile and accurate pistol, designed for training and recreational shooting.

The MAUSER PP7 in .22LR combines compactness, low recoil and modern ergonomics for shooting range sessions.

- **brand:** MAUSER
- **model:** PP7
- **caliber:** .22LR
- **capacity:** 10 shots
- **barrel length:** 11.43 cm
- **Safety:** Safety catch + decocking
- **barrel type:** Rifled
- **total length:** 19 cm
- **weight:** 750 g
- **stock:** Ergonomic polymer
- **warranty:** 2 years

Ergonomics and stock

The **polymer stock** provides a stable grip and reduced maintenance compared to wood. The polymer is lightweight, moisture-resistant, and allows for ergonomic molded shapes that help position the hand repeatably, improving shot consistency.

Security

The .22LR Mauser PP7 pistol is equipped with an **ambidextrous safety catch** on the slide as well as a **decocking lever** on the left side of the pistol. When the hammer is cocked, the decocking action will bring the hammer to the **half-cock position**. Decocking allows the weapon to be on

safety while still having a cartridge chambered.

Rifled barrel

A **rifled barrel** has internal helical grooves that cause the bullet to spin. This rotation stabilizes the projectile and improves accuracy at firing ranges, which is especially useful with the **.22LR** caliber.

.22LR

The **.22LR** caliber is a rimfire cartridge, valued for its low cost and low recoil. It allows for gradual learning and numerous training rounds without excessive budget constraints.

Steel frame

The use of a **steel** structure provides rigidity and longevity to the mechanical assembly. Steel withstands repeated stresses and, when properly maintained, ensures dimensional consistency, which is conducive to precision.

Usage and compliance

Intended for recreational shooting and range training. In France, the **pistol** belongs to category B and its acquisition/use is subject to the applicable legal framework (prefectural authorizations and shooting range rules). Be sure to comply with the regulations in force.

Recommendations for use

Use quality .22LR ammunition to ensure reliable feeding and preserve the mechanism. Clean the barrel and moving parts regularly to maintain accuracy and longevity. The polymer requires only simple maintenance (wiping, checking fasteners).

- **threaded barrel:** No
- **Sight type:** Fixed sight
- **use:** recreational shooting, training
