Specifically designed for semi-automatic gas-operated rifles. Reliable, smooth, and requiring no adjustments: the silencer designed for rapid-fire shooting.

The **Stalon X-Venti** is designed specifically for gas-operated semi-automatic rifles. Thanks to its Venti technology, it redirects gases forward, minimizing gas blowback to the face while ensuring a clean and consistent firing cycle. No rifle adjustments are necessary: it installs simply by **plug and play** .

- **Special semi-automatic gas-operated**
- **Noise attenuation** : up to -28 dBc (.308)
- **Total length** : 241.5 mm
- **Front barrel extension** : 108 mm
- **Length on the barrel** : 133.5 mm
- **Weight** : from 346 g (without stand)
- **Diameter** : 49.1 mm
- **Construction** : telescopic, over barrel
- **Finish** : matte black, central gold ring
- **Available thread sizes** : M14x1 - max. .30 caliber - M15x1 - max. .375 caliber
- **Materials** : anodized aluminum + stainless steel baffle
- **Maximum barrel diameter** : standard 22.5 mm / optional 25 mm

Designed for driven hunts, dynamic shooting, or any high-rate-of-fire situation, the **Stalon X-Venti** combines acoustic performance, gas reduction, and smooth mechanical operation. Designed for gas-operated semi-automatic firearms, it integrates without adjustment and ensures consistent reliability even under the most demanding conditions.

A technology designed for semi-automatic vehicles

The X-Venti is part of the Venti range, developed to redirect gases forward inside the suppressor. The result: less gas in the face, less heat around the slide, and controlled reloading without modifying the original gas system. Internal pressure is smoothed for a clean and consistent cycle.

Telescopic construction and high-end materials

With its telescopic **over-barrel** design, the X-Venti adds only 108 mm to the muzzle. It wraps around the barrel for 133.5 mm, perfectly balancing the entire assembly. Anodized aluminum ensures lightness and strength, while the stainless steel baffle absorbs initial pressure. The threading is also stainless steel for a secure fit.

Two models for greater versatility

- **M14x1** - For rifles chambered in .308, .30-06, etc.
- **M15x1** - For calibers up to .375, such as the .338

The X-Venti is suitable for users seeking a durable and effective solution without having to adjust their firearm. Ideal for driven hunts as well as for PRS or tactical shooters.

FAQ

Is the X-Venti compatible with bolt-action weapons?

Technically yes, but its design is optimized for gas-operated semi-automatic rifles. For a bolt-action rifle, other models in the Stalon range might be more suitable.

Is it necessary to adjust the weapon's gas system?

No, the X-Venti is designed to operate without modification to the gas system. It guarantees optimal operating consistency.

What is the difference with the XS-Venti?

The X-Venti is slightly longer and heavier, but offers better sound attenuation (-28 dBc versus -27 dBc for the XS). It is better suited to longer sessions or larger caliber weapons.
