GE05483	Geissele SSP AR-15-AR10 Trigger Détente	A	469.00 € incl. tax

### A clean and direct start for shooters seeking pure precision.

The **Geissele SSP** is the first truly **single-stage** trigger designed by Geissele Automatics. With its direct break and no initial travel, it offers a **crisp break point** and a short, clean reset for effective tactile feedback. Ideal for precision shooting, it is also suitable for hunting or demanding tactical use.

- **Type** : Single-stage
- **Use** : Precision shooting, hunting, advanced recreational shooting
- **Starting weight** : 3.0 – 3.75 lbs
- **Trigger tail** : Flat (flat bow)
- **Compatibility** : AR-15 / AR-10 – Mil-Spec pins
- **Materials** : S7 steel – high-precision EDM machining
- **Finish** : Anti-corrosion black oxide

The Geissele SSP (Single-Stage Precision®) is an ultra-precise drop-in trigger, designed for shooters seeking a direct break without the approach travel characteristic of two-stage triggers. It is distinguished by its linearity, clean break, and consistency from shot to shot.

### A high-precision single-stage trigger

Designed to deliver a crisp break point from the initial pressure, the SSP allows for total control of the trigger pull, with no play or surprises. The short, clean reset ensures rapid, repeated shots with clear feedback under the finger.

### Technical materials and durable finish

Machined from S7 steel, the trigger is cut using electrical discharge machining (EDM) for maximum precision. The entire assembly is protected by a **black oxide anti-corrosion** coating, designed to withstand the most demanding conditions.

### **Ideal for precision, hunting and tactical use**

Its light starting weight (3 to 3.75 lbs) and flat geometry promote accurate long-range shooting, whether in the field or at a target. Its AR-15/AR-10 compatibility makes it a reliable solution for many semi-automatic platforms.

### **FAQ**

#### **Is the SSP trigger suitable for long-range precision shooting?**

Yes, the Geissele SSP trigger was specifically designed for precision shooting, with a crisp, consistent break and no initial play.

#### **Is it an adjustable trigger?**

No, the SSP is not adjustable. It is factory calibrated to provide an ideal starting weight between 3 and 3.75 lbs.

#### **Can I mount the SSP on an AR10 platform?**

Yes, this trigger is compatible with AR15 and AR10 rifles using Mil-Spec pins. No adjustments are required for installation.
