KIMZ104	C&H RMSc Optical Plate for Kimber 2K11	BF769	B	120.00 € incl. tax

RMSc aluminum interface for Kimber 2K11.

The **C&H Precision optical plate** for **the Kimber 2K11** allows the mounting of **RMSc** standard optics. Machined from **6061 aluminum** on HAAS CNC centers and reinforced with an **S7 tool steel T-nut** , it ensures precise and durable support.

- **Weapon compatibility** : Kimber 2K11
- **Footprint** : RMSc
- **Material** : CNC machined 6061 aluminum
- **Reinforcement** : T-nut made of S7 tool steel
- **Finish** : Type III MIL-SPEC black anodizing
- **Manufacturing** : HAAS machining - multiple quality controls

Specifically designed for the Kimber 2K11, this C&H Precision plate allows for the installation of RMSc standard optics with a particularly precise level of adjustment. The assembly prioritizes lightness, rigidity, and consistency.

High-precision 6061 aluminum construction

The plate body is machined from 6061 aluminum on HAAS CNC machines. This material combines lightness and strength, while allowing for fine machining with tight tolerances.

S7 tool steel T-nut

The integration of an S7 tool steel T-nut reinforces the mounting area. In practice, this improves the stability of the optics and reduces stress on the aluminum during repeated cycles.

MIL-SPEC Type III Finish

Type III MIL-SPEC black anodizing offers excellent resistance to wear and corrosion. This is a crucial technical detail for preserving the part's integrity over time.

FAQ

Is this plate compatible with all RMSc optics?

It is designed for optics conforming to the standard RMSc footprint. It is recommended to verify the exact specifications of the optic before installation.

Is the license plate specific to Kimber 2K11?

Yes, this version is developed exclusively for the Kimber 2K11. Compatibility with other models is not guaranteed.

Why incorporate an S7 steel T-nut?

The S7 tool steel T-nut reinforces the fixing and improves mechanical resistance, ensuring durable retention of the optics.
