Quick multi-diameter mounting for CZ with reliable precision

The **INNOMOUNT QD mount** for **the CZ 550 and 557** is available in several diameters and a raised version to accommodate various optical configurations. Its retractable lever system allows for quick, smooth, and tool-free removal, while ensuring excellent point-of-impact repeatability. In use, its intuitive mechanics and robust construction make it ideally suited to the demands of the field.

- **Weapon compatibility** : CZ 550 / CZ 557
- **System** : Secure retractable locking lever
- **Controls** : Push buttons for unlocking
- **Materials** : High-strength aluminum / treated steel

- **Available diameters** : 26 mm, 30 mm, 34 mm, 36 mm, 40 mm
- **Height** : 19 mm (+3 mm)
- **Ring spacing** : 89 mm
- **Total length** : 141 mm
- **Compatibility** : CZ 550 / CZ 557

The INNOMOUNT QD mount for CZ 550 and 557 is available in several diameters to fit a wide range of scopes.

Wide compatibility

Available in **26mm, 30mm, 34mm, 36mm and 40mm** , this mount covers the majority of lenses on the market. An ideal solution for standardizing your equipment.

A reliable Quick Detach system

The **secure retractable levers** allow for quick, tool-free assembly and disassembly. The push buttons ensure controlled operation and prevent accidental opening.

Adapted to specific configurations

The raised version allows for optimal optics positioning according to needs. In practice, this improves aiming comfort and the overall consistency of the mount.

Robustness and stability

With a **center-to-center distance of 89 mm** and a **total length of 141 mm** , stress distribution is optimal. The **high-strength aluminum** and **treated steel** construction ensures excellent durability.

FAQ

What diameters are available?

This assembly is available in 26 mm, 30 mm, 34 mm, 36 mm and 40 mm.

Does the assembly require any tools?

No, the QD system allows for quick assembly and disassembly without tools.

Is the setting retained after disassembly?

Yes, if the assembly is correctly adjusted, the repeatability of the point of impact is ensured.
