### Quick multi-height mounting for Weaver/Picatinny rail

The **INNOMOUNT QD mount** for 40mm **Weaver and Picatinny** rails is available in several heights to accommodate even the most demanding optical setups. Its retractable lever system allows for quick, smooth, and tool-free removal, while ensuring excellent repeatability of the point of impact. In use, the overall robustness and precise adjustments are appreciated, guaranteeing reliable and consistent support.

- **Rail compatibility** : Weaver / Picatinny
- **System** : Secure retractable locking lever
- **Controls** : Push buttons for unlocking
- **Ring center distance** : 81 mm
- **Distance between axes** : 110 mm
- **Total length** : 142 mm
- **Materials** : High-strength aluminum / treated steel
- **Compatibility** : Glasses with a 40mm center tube
  
- **Diameter** : 40 mm
- **Available heights** : 14 mm, 17 mm, 20 mm
- **Ring center distance** : 81 mm
- **Distance between axes** : 110 mm
- **Total length** : 142 mm
- **Compatibility** : Weaver/Picatinny rails

The INNOMOUNT QD mount for 40mm diameter Weaver and Picatinny rails offers a reliable and quick solution for installing your optics.

## **Wide compatibility**

Compatible with **Weaver and Picatinny** standards, this mount adapts to a wide range of weapons and configurations. A real plus for those looking for versatility.

## **A high-performance Quick Detach system**

The **secure retractable levers** allow for quick, tool-free assembly and disassembly. The push buttons ensure controlled operation and prevent accidental opening.

## **Adaptation and stability**

Available in **14mm, 17mm, and 20mm**, this mount allows for precise adjustment of the optic's position. Its **high-strength aluminum** and **treated steel** construction ensures a reliable and durable hold.

## **FAQ**

### **Is this setup compatible with all Picatinny rails?**

Yes, it is designed to be compatible with Weaver and Picatinny standards.

### **Does the assembly require any tools?**

No, the QD system allows for quick assembly and disassembly without tools.

### **Is the setting retained after disassembly?**

Yes, if the assembly is correctly adjusted, the repeatability of the point of impact is ensured.
