### Quick mounting system dedicated to Schmidt & Bender Convex

The **INNOMOUNT QD** mount for the **Sauer 303 SN**, designed for **Schmidt & Bender Convex** optics, offers a quick, reliable, and perfectly fitting mounting solution. Its retractable lever system allows for smooth, tool-free removal while ensuring excellent repeatability of the point of impact. In use, the quality of the machining and the precision of the clamping are immediately apparent—two key factors for maintaining consistent focusing.

- **Weapon compatibility** : Sauer 303 SN
- **Optical compatibility** : Schmidt & Bender Convex
- **System** : Secure retractable locking lever
- **Controls** : Push buttons for unlocking
- **Materials** : High-strength aluminum / treated steel
- **Compatibility** : Schmidt & Bender Convex
- **Height** : 9 mm
- **Total length** : 120 mm
- **Compatibility** : Sauer 303 SN

The INNOMOUNT QD mount for Sauer 303 SN, dedicated to Schmidt & Bender Convex optics, guarantees a fast, reliable and perfectly adapted attachment.

#### A high-performance Quick Detach system

The **secure retractable levers** allow for quick, tool-free assembly and disassembly. The push buttons ensure simple and safe operation, even in the field.

#### Specific Schmidt & Bender compatibility

This mount is designed for **Schmidt & Bender Convex** optics, ensuring precise adjustment and optimal integration on Sauer 303 SN.

## **Precision and robustness**

With a **length of 120 mm** and a construction of **high-strength aluminum** and **treated steel** , this mount ensures reliable support and excellent repeatability of the point of impact.

## **FAQ**

### **Is this assembly compatible with all Sauer 303 models?**

It is designed for Sauer 303 models equipped with the SN system. Check the compatibility of your weapon.

### **Does the assembly require any tools?**

No, the QD system allows for quick assembly and disassembly without tools.

### **Is the setting retained after disassembly?**

Yes, if the assembly is correctly adjusted, the repeatability of the point of impact is ensured.
