INNOMOUNT quick-release mounting system for Sauer, guaranteed precision

The **INNOMOUNT QD mount** for **Sauer 404 and 303 rifles** represents a high-end solution designed for demanding users. Constructed with premium materials, it offers quick, tool-free removal while ensuring excellent point-of-impact repeatability. Available in three heights, it adapts precisely to your optical setup.

- **Brand** : INNOMOUNT
- **Compatibility** : Sauer 404 / Sauer 303
- **Type** : QD (Quick Detach) Quick Detachable Mount
- **Materials** : High-strength aluminum / treated steel
- **System** : retractable locking levers with push buttons

- **Available heights** : 14 mm (standard), 17 mm, 20 mm
- **Collar width** : 15 mm
- **Collar spacing** : 76 mm
- **Total length** : 135 mm
- **Weight** : 150 to 180 g depending on the version

Reliable and intuitive Quick Detach system

The **QD (Quick Detach)** system relies on two retractable locking levers. Discreet when closed, they prevent accidental opening - exactly the kind of detail you appreciate in the field. Opening is achieved via thumb-operated push buttons, making operation quick and virtually tool-free.

Repeatability and precision guaranteed.

Once properly adjusted, the assembly guarantees **consistent repeatability** after each disassembly/reassembly. In other words, its point of impact is always accurately reproduced, which is essential for demanding users. In practice, this stability inspires confidence.

Three heights for a perfect fit

Available in **14mm (standard), 17mm, and 20mm** , this mount allows for perfect adjustment of the optic's position according to the objective lens diameter or shooting preference. This range of heights offers true flexibility - fine-tuning your mount without compromise.

Sturdy and durable construction

Made from **high-strength aluminum** and **treated steel** , the assembly ensures excellent durability. The design remains lightweight while offering remarkable rigidity - a balance that is noticeable as soon as you pick it up.

FAQ

Does this assembly retain the setting after disassembly?

Yes, provided the clamping forces are correctly set, the INNOMOUNT QD assembly guarantees excellent repeatability of the impact point after reassembly.

Does disassembly require tools?

No, the Quick Detach system allows for quick and almost tool-free disassembly thanks to its push-button levers.

Which height should I choose: 14, 17, or 20 mm?

The height depends primarily on the diameter of your lens and your viewing comfort. 14 mm is the standard version, while 17 and 20 mm offer more clearance for larger lenses.
