INNOMOUNT quick-release mounting system for Sauer, maximum precision

The **INNOMOUNT QD mount** for **Sauer 404 and 303** 34mm diameter lenses meets the demands of modern, large-tube optics. Designed for heavy-duty use, it allows for quick, tool-free removal while maintaining excellent repeatability. In use, the precision and stability of the assembly are immediately apparent.

- **Brand** : INNOMOUNT
- **Compatibility** : Sauer 404 / Sauer 303
- **Type** : QD (Quick Detach) Quick Detachable Mount
- **Collar diameter** : 34 mm
- **Materials** : High-strength aluminum / treated steel
- **System** : retractable levers with push buttons

- **Available heights** : 14 mm (standard), 17 mm, 20 mm, 23 mm
- **Collar width** : 15 mm
- **Collar spacing** : 76 mm
- **Total length** : 135 mm
- **Weight** : 150 to 180 g depending on the version

The **INNOMOUNT QD mount** in Ø34 mm is perfectly suited to optics with large tube diameters. It offers a reliable and quick solution for installing or removing a telescope while maintaining a constant zero - a real advantage when switching between different setups.

A QD system designed for safety

The two retractable levers ensure secure and discreet locking. Once closed, they are protected against accidental operation. The push-button opening allows for quick and natural handling - even in challenging conditions.

Reliable repeatability after each manipulation

The assembly returns precisely to its initial position after disassembly. Specifically, the point of impact remains constant if the adjustment is correct. This is a key point for regular users.

Four height settings to accommodate all lenses

Available in **14, 17, 20, and 23 mm** , it allows you to perfectly adjust the viewing height to suit your lens. Whether the lens is compact or large, the mount adapts without compromise.

Robust and balanced construction

The combination of **high-strength aluminum** and **treated steel** ensures excellent durability. The assembly remains lightweight while offering reassuring rigidity - a balance that is immediately noticeable when handling it.

FAQ

Is this mount compatible with 34mm glasses?

Yes, this version is specifically designed for glasses with a 34mm tube.

Does the QD system retain its settings after disassembly?

Yes, once properly adjusted, the assembly ensures excellent repeatability of the point of impact after reassembly.

What height should I choose for a large-lens lens?

For large objective lenses, heights of 20 or 23 mm generally offer better clearance and optimal viewing comfort.
