- **System** : retractable levers with push buttons

- **Construction height** : 6 mm
- **Total length** : 120 mm
- **Weight** : 150 to 180 g depending on the version

The **INNOMOUNT QD Slight Long mount** is an ideal solution for equipping a Sauer rifle with a compact red dot sight. Its low-profile design promotes a quick and natural target acquisition - you'll be surprised by the improved responsiveness from the very first use.

A discreet and efficient Quick Detach system

The QD mechanism relies on two integrated retractable levers. Once locked, they remain perfectly flush, minimizing any risk of snagging or accidental opening. Opening is achieved via thumb-operated push buttons - simple, quick, and efficient.

Extended compatibility with red dots

This mount accepts a wide range of Docter-standard lenses: **Noblex, Geco, Leica Tempus, Vortex, Burris FastFire, Kahles Helia RD** . This versatility allows you to easily adapt your equipment to your preferences.

Repeatability and consistency of the setting

Once properly adjusted, the assembly ensures **reliable repeatability** after disassembly. Specifically, the point of impact remains constant - a crucial advantage for regular users.

Robust construction and low profile

Made from **high-strength aluminum** and **treated steel** , this mount offers excellent durability while maintaining a very low profile. This positioning promotes a natural and rapid sight picture - particularly beneficial with a red dot sight.

FAQ

Is this setup compatible with all red dots?

It is compatible with Docter standard red dot sights, such as Noblex, Leica Tempus, Vortex, Burris FastFire or Kahles Helia RD.

Is the assembly truly tool-free?

Yes, the QD system allows for quick tool-free disassembly thanks to the push-button levers.

Does this assembly retain the setting after disassembly?

Yes, once properly adjusted, it ensures excellent repeatability of the point of impact after reassembly.
