QD INNOMOUNT long Picatinny mount, increased stability and range

The **INNOMOUNT QD Long mount** for **Sauer 404 and 303** with Picatinny rail offers an expanded surface area for mounting optics and accessories. Designed for demanding use, it allows for quick, tool-free removal while ensuring excellent repeatability. In practice, this combination of rigidity and versatility is highly valued.

- **Brand** : INNOMOUNT
- **Compatibility** : Sauer 404 / Sauer 303
- **Type** : QD (Quick Detach) Quick Detachable Mount
- **Interface** : Long Picatinny rail
- **Materials** : High-strength aluminum / treated steel
- **System** : retractable levers with push buttons

- **Construction height** : 20 mm
- **Total length** : 190 mm
- **Usable rail length** : 180 mm
- **Weight** : 200 g

The **INNOMOUNT QD Long Picatinny mount** transforms your Sauer platform into a particularly wide base. It allows for precise positioning of optics, especially for configurations requiring more distance or adjustment - a real advantage when you're looking to optimize your ergonomics.

A reliable and secure QD system

The mechanism relies on two retractable locking levers. Once closed, they remain flush, preventing any accidental opening. Activation via push buttons ensures quick operation, even in field conditions - simple, efficient, and predictable.

Long rail for maximum flexibility

With its **180mm of usable rail** , this mount offers great positioning freedom. The optics can be precisely adjusted according to your body shape or usage requirements - this is exactly the kind of detail that makes a difference in practice.

Constant repeatability

After disassembly and reassembly, the assembly returns to its precise position. If the tightening is correctly adjusted, the point of impact remains stable - an essential point for maintaining the settings over time.

Robust and balanced construction

Made from **high-strength aluminum** and **treated steel** , this assembly ensures excellent durability. Despite its length, it maintains good balance - the whole assembly remains rigid and perfectly fitted when handled.

FAQ

What is the purpose of a long Picatinny rail?

It allows for more flexible positioning of the optics, particularly for adjusting recoil or adapting the configuration to the shooter's morphology.

Can the assembly be removed without tools?

Yes, the Quick Detach system allows for quick tool-free disassembly thanks to the push-button levers.

Is the setting retained after disassembly?

Yes, once correctly adjusted, the assembly guarantees excellent repeatability of positioning after reassembly.
