The **INNOMOUNT QD mount for Schmidt & Bender Convex** allows for direct integration of the optic with a particularly low profile. The result: a natural line of sight and immediate handling - you gain comfort without even thinking about it.

A discreet and efficient QD system

The Quick Detach mechanism relies on two integrated retractable levers. Once locked, they remain flush, minimizing any risk of snagging or accidental opening. Push-button opening ensures simple, quick, and secure operation.

Schmidt & Bender Convex interface

The **Convex** standard allows for direct mounting of certain Schmidt & Bender lenses, without rings or adapters. This results in a lower, more rigid, and perfectly aligned mount - a real advantage in terms of precision and ergonomics.

Constant repeatability

After disassembly and reassembly, the assembly returns to its precise position. If the tightening is correctly adjusted, the point of impact remains stable - an essential point for regular use.

Robust and balanced construction

Made from **high-strength aluminum** and **treated steel** , this assembly offers excellent durability. Upon handling, the assembly inspires confidence - it's clean, rigid, and play-free.

FAQ
