QD INNOMOUNT long Picatinny mount for Tikka/Sako

The **INNOMOUNT QD Long mount** for **Tikka T3/T3x and Sako TRG** scopes with a Picatinny rail offers an extended surface area for optics positioning. Designed for demanding use, it allows for quick, tool-free removal while ensuring excellent repeatability. In practice, this combination of rigidity and flexibility is highly valued.

- **Brand** : INNOMOUNT
- **Compatibility** : Tikka T3 / T3x, Sako TRG 21 / 22 / 41 / 42
- **Type** : QD (Quick Detach) Quick Detachable Mount
- **Interface** : Long Picatinny rail
- **Materials** : High-strength aluminum / treated steel
- **System** : retractable levers with push buttons

- **Construction height** : 20 mm
- **Total length** : 200 mm
- **Weight** : 150 to 180 g depending on the version

The **INNOMOUNT QD Long Picatinny mount** allows for the use of an extended rail surface to precisely adjust the optic's position. It is designed for users who require maximum freedom in their setup - particularly for optimizing recoil or balance.

A reliable and secure QD system

The mechanism relies on two integrated retractable levers. Once locked, they remain flush, minimizing any risk of accidental opening. Activation via push buttons allows for quick and intuitive operation - a real advantage in field conditions.

Long rail for maximum flexibility

Thanks to its significant length, this **Picatinny** rail offers great freedom of positioning. The optics can be adjusted to the millimeter, according to your needs or body shape - a detail that quickly

makes a difference in use.

Constant repeatability

After disassembly and reassembly, the assembly returns to its precise position. If the tightening is correctly adjusted, the point of impact remains stable - a key point for maintaining the settings.

Robust and balanced construction

Made from **high-strength aluminum** and **treated steel** , this assembly ensures excellent durability. Despite its length, it maintains good balance - the whole assembly remains rigid and perfectly fitted when handled.

FAQ

What is the purpose of a long Picatinny rail?

It allows for more flexible positioning of the optics, particularly to adjust the distance or optimize ergonomics according to the user.

Can the assembly be removed without tools?

Yes, the Quick Detach system allows for quick tool-free disassembly thanks to the push-button levers.

Is the setting retained after disassembly?

Yes, once correctly adjusted, the assembly guarantees excellent repeatability of positioning after reassembly.
