The **INNOMOUNT QD LM Rail mount** allows for direct integration of compatible optics onto Tikka and Sako TRG platforms. It offers a clean, low-profile, and efficient solution for quickly mounting or removing a scope - true user comfort.

A reliable Quick Detach system

The mechanism relies on two integrated retractable levers. Once locked, they remain flush, minimizing any risk of accidental opening. Activation via push buttons allows for quick and intuitive operation, even in field conditions.

LM Rail interface for direct integration

The **LM Rail** standard allows for direct mounting of optics without rings. The result: a lower sight line, increased rigidity, and perfectly integrated design - a detail that makes all the difference in

everyday use.

Constant repeatability

After disassembly and reassembly, the assembly returns to its precise position. If the tightening is correctly adjusted, the point of impact remains stable - an essential point for demanding users.

Robust and balanced construction

Made from **high-strength aluminum** and **treated steel** , this assembly ensures excellent durability. Upon handling, the whole thing feels rigid and perfectly fitted - a quality that is immediately apparent.

FAQ

What is an LM Rail assembly?

The LM Rail is a mounting system that allows for the direct mounting of certain glasses without rings, offering better rigidity and a lower profile.

Can the assembly be removed without tools?

Yes, the Quick Detach system allows for quick tool-free disassembly thanks to the push-button levers.

Is the setting retained after disassembly?

Yes, once correctly adjusted, the assembly guarantees excellent repeatability of positioning after reassembly.
