The **INNOMOUNT QD mount for Schmidt & Bender Convex** allows direct attachment of the optic to Tikka and Sako TRG platforms. Its low profile promotes a natural sight line - a detail immediately noticeable when shouldering the scope.

A reliable Quick Detach system

The mechanism relies on two integrated retractable levers. Once locked, they remain flush, minimizing any risk of accidental opening. Activation via push buttons allows for quick, simple, and efficient operation.

Schmidt & Bender Convex interface

The **Convex** standard allows for direct mounting of certain Schmidt & Bender lenses, without rings. The result: a lower, more rigid, and perfectly aligned mount - a real advantage in terms of precision

and comfort.

Constant repeatability

After disassembly and reassembly, the assembly returns to its precise position. If the tightening is correctly adjusted, the point of impact remains stable - an essential point for demanding users.

Robust and balanced construction

Made from **high-strength aluminum** and **treated steel** , this assembly ensures excellent durability. Upon handling, the whole thing feels rigid and perfectly fitted - a quality that is immediately apparent.

FAQ

What is the Schmidt & Bender Convex mount?

The Convex system allows direct mounting of certain Schmidt & Bender lenses without rings, offering a lower and more rigid mounting.

Can the assembly be removed without tools?

Yes, the Quick Detach system allows for quick tool-free disassembly thanks to the push-button levers.

Is the setting retained after disassembly?

Yes, once correctly adjusted, the assembly guarantees excellent repeatability of positioning after reassembly.
