## Precise and robust low-profile mounting for 70° rail.

The **INNOMOUNT Base Rail 70° Bottom 3 cm** is a reliable mounting solution for optics on rails with a specific profile.
Made from machined steel, it ensures a solid fixing and precise alignment of your equipment.

- **Type:** 70° rail mounting base
- **Height:** 3 cm
- **Profile:** low
- **Material:** Machined steel
- **Fastening:** screw tightening
- **Compatibility:** 70° rail

### A specific mounting for 70° rails

This base is designed for **70° rail profile** configurations, offering optimal optic support. In practice, this ensures stable positioning, even during repeated firing.

### Low profile for better line of sight

At 3 cm high, this low-profile version promotes a natural shooting position. This improves visual comfort and speed of target acquisition - a detail that makes all the difference in the field.

### Sturdy and durable construction

Precision-machined, the **INNOMOUNT** base offers excellent resistance to mechanical stress. The screw clamping system ensures a reliable hold, minimizing any play or movement of the optics.

### Simple and efficient installation

- **Assembly:** quick with clamping screws
- **Use:** hunting and sport shooting
- **Support:** excellent durability

- **Position:** precise alignment of the optics

**FAQ**

**What does a 70° rail correspond to?**

This is a specific profile used on certain weapons for mounting optics. It requires compatible bases like this model.

**Is this base suitable for all lenses?**

It is compatible with lenses using this type of 70° rail. It is important to check compatibility with your mounting system.

**What are the advantages of a low-profile mounting?**

A low mount improves eye/optics alignment, providing better ergonomics and faster target acquisition.
