The **Kimber 2K11 Pro OR Stainless** takes the core elements that made the 2K11 a success and puts them in a more compact and exceptionally versatile version. Designed with modern shooters in mind, it combines match-grade precision, optical compatibility, and advanced ergonomics in a premium platform entirely assembled in the USA.

An optimized 2K11 platform

Each **Kimber 2K11 Pro** is individually assembled by a specialist technician to guarantee a particularly high level of fit. This approach is immediately noticeable on the track: smooth cycling, crisp lockout, and excellent mechanical consistency.

The new, optimized steel subframe improves magazine insertion and overall weapon control, while the flared magazine well naturally speeds up reloads.

Canon match 4.25" and 5R rifling

DLC fluted stainless steel barrel

The 4.25-inch stainless steel barrel receives a **DLC** finish as well as a fluted and ramped profile promoting regularity of operation and longevity of mechanical surfaces.

No scratch, 1:10 on the left

The barrel features **5R rifling with a 1:10"** twist rate and left-hand twist. This configuration contributes to projectile stability and the exceptionally clean firing behavior of the 2K11 Pro.

Incidentally, the recoil is surprisingly well controlled for such a compact platform - you can clearly feel the work done on the overall balance of the weapon.

Optic Ready and premium equipment

The 2K11 Pro comes standard with a **C&H Precision** base compatible with **Trijicon RMR** . Other optical interfaces are available separately for RMSc, ACRO, DPP, or 509T footprints.

The **TAG FiberLok 2** front sight ensures rapid target acquisition while the accessory rail allows for the installation of a light or laser.

GT Match Grade Relaxation

The **GT Match Grade aluminum trigger** offers a short throw, with no perceptible crunch and a crisp break set between 3 and 4 pounds. It's exactly the kind of detail you notice immediately from the very first shots.

Simplified maintenance

Kimber incorporates a patented, tool-free guide rod that significantly simplifies disassembly and routine maintenance. Overall, this solution makes daily maintenance operations faster and more convenient.

FAQ

Is the Kimber 2K11 Pro Optic Ready?

Yes. The gun comes with a C&H Precision base compatible with Trijicon RMR.

What is the capacity of the Kimber 2K11 Pro?

The model comes with two UHC magazines with a capacity of 19 rounds in 9x19 caliber.

What is the rifling twist rate of the barrel?

The barrel has 5 grooves with a 1:10 inch twist rate and a left-hand rotation.

What trigger pull system is included in the Kimber 2K11 Pro?

The pistol features a GT Match Grade aluminum trigger with a trigger pull weight between 3 and 4 pounds.
