Ultra-low profile quick-lever mount for Shield optics on Picatinny rail.

The **ERATAC USL mount** is designed for **shield** -type optics and offers a particularly low axis height of 27.8 mm. Its compact, quick-lever design ensures reliable attachment, minimal bulk, and excellent repeatability during removal and reinstallation on Picatinny rails.

- **Compatibility** : Shield Optics
- **Axle height** : 27.8 mm
- **System** : USL (Ultra-Slim Lever)
- **Mounting** : Picatinny rail
- **Diameter indicated** : 30 mm
- **Material** : High-strength aluminum
- **Finish** : Matte black
- **Advantage** : Ultra-thin profile with no protruding elements

The ERATAC USL EU2018100 mount allows for the installation of a Shield optic on a Picatinny rail with a pivot height of only 27.8 mm. This configuration promotes discreet integration and excellent aiming comfort.

A particularly compact profile

Thanks to its Ultra-Slim Lever design, this mount minimizes lateral bulk. No unnecessary elements hinder handling or risk snagging on the equipment.

Quick and secure attachment

The ERATAC lever system ensures a firm lock on the Picatinny rail while allowing for quick removal when needed. In use, the quality of the fit and the precision of the mechanism are immediately apparent.

Axle height of 27.8 mm

This low height allows for a sight line close to the axis of the weapon. The result is a balanced, ergonomic setup that is comfortable to use during long sessions.

Designed to last

Made from high-quality materials and featuring a durable matte black finish, the EU2018100 assembly meets the requirements of users seeking reliability and long-term durability.

FAQ

Which lenses is this setup compatible with?

The EU2018100 model is designed for optics using the Shield interface.

What is the axis height of this assembly?

The axis height is 27.8 mm, which allows for a particularly low mounting of the optics.

Is the mount compatible with a Picatinny rail?

Yes, it is designed for direct installation on a Picatinny rail with a quick-locking system.

What is the purpose of the USL system?

The Ultra-Slim Lever system reduces the bulk of the mounting while maintaining reliable locking and excellent ease of use.
