## The ideal scope to improve accuracy on .22 LR rifles or air rifles.

The **Microdot First 3-9x50** is a riflescope designed for **recreational shooting** and learning about precision optics. Easy to handle, robust, and supplied with Picatinny rings, it's an excellent choice for equipping a .22 LR or air rifle and fully exploiting its potential.

- **Variable magnification** 3 to 9x
- 50mm **lens** for good brightness
- **Mounting** with included Picatinny rings
- **Designed for** .22 LR rifles and air rifles
- **Easy to use** for both beginner and experienced shooters
- **An economical solution** to improve shooting accuracy

- **Length** : 320 mm
- **Weight** : 490 g

The **Microdot First 3-9x50** significantly improves aiming comfort and target shooting accuracy. Thanks to its variable magnification and 50mm objective lens, it is ideal for both recreational and training shooting sessions.

### A lens designed for recreational shooting

This scope was specifically developed for users looking to take their accuracy to the next level. On a .22 LR or air rifle, it provides improved aiming control and facilitates shot placement at medium range.

### Variable magnification 3 to 9x

The adjustable magnification allows you to adapt the view to the shooting distance. This versatility is particularly valuable during target practice where conditions and distances can vary. In practice, you'll quickly find yourself making better use of your weapon's capabilities.

### 50mm lens for a bright image

The large lens promotes light transmission and improves visual comfort. The image remains pleasant to view, which helps to reduce fatigue during long shooting sessions.

**Picatinny mount included**

Supplied with its Picatinny mounting rings, the scope is ready to be installed on many compatible rifles. This complete solution simplifies weapon equipment and allows for quick deployment.

**Balanced and comfortable format**

At 320 mm long and weighing 490 g, the Microdot First maintains good balance on the firearm. This compromise between stability and lightness contributes to a natural grip, particularly appreciated during repeated shooting sessions.

**FAQ**

**What types of rifles is this scope suitable for?**

The Microdot First 3-9x50 is particularly suited to .22 LR caliber rifles as well as air rifles intended for recreational shooting.

**Are the mounting collars included?**

Yes. The scope comes with its mounting rings compatible with Picatinny rails.

**What is the advantage of a 50mm lens?**

A 50mm lens captures more light, which improves visual comfort and the quality of the observed image.

**Is this telescope suitable for beginners?**

Yes. Its simple use, moderate magnification and easy mounting make it an excellent option for discovering optics shooting.
