INNOMOUNT quick-release assembly with guaranteed return to zero.

The **INNOMOUNT QD quick-release mount** is designed for **Pulsar Trail 2** and **Digisight Ultra** optics on **Weaver/Picatinny** rails. Its two retractable lever system ensures reliable locking, quick removal, and excellent repeatability of the point of impact after remounting, while offering a robust construction of high-strength aluminum and treated steel.

- **Compatibility:** Pulsar Trail 2 / Trail 2 LRF
- **Compatibility:** Pulsar Digisight Ultra N355
- **Compatibility:** Pulsar Digisight Ultra N450 / N450 LRF
- **Compatibility:** Pulsar Digisight Ultra N455 / N455 LRF
- **Compatible rail:** Weaver / Picatinny
- **Mounting type:** QD (Quick Detach) with two levers
- **Construction height:** 17 mm
- **Center-to-center distance of clamping axes:** 60 to 115 mm
- **Total length:** 160 mm
- **Weight:** 150 to 180 g depending on the version
- **Materials:** High-strength aluminum and hardened steel
- **Control:** Two manually operated push buttons with retractable levers

A quick assembly designed for the field

Thanks to its **Quick Detach (QD)** system, this mount allows for the installation or removal of a lens in just seconds. The two retractable locking levers remain integrated into the mount body when closed, thus minimizing the risk of accidental opening during transport or field use.

Excellent repeatability after reassembly

One of the main advantages of **INNOMOUNT** mounts lies in their remarkable **zero-return** capability. Once the clamping forces are correctly set, removing and then reinstalling the optics allows you to return to the initial alignment with very high precision. This is a particularly valuable

advantage when several pieces of equipment are used on the same platform.

Compatible with Pulsar optics

This model is specifically designed for the **Pulsar Trail 2** , **Trail 2 LRF** , and the various **Digisight Ultra** versions (N355, N450, N450 LRF, N455, and N455 LRF). Its interface ensures a perfectly adapted fit while maintaining excellent rigidity.

High-end materials

The body is machined from **high-strength aluminum** , while the parts subjected to mechanical stress are made of **hardened steel** . This choice of materials offers an excellent compromise between lightness, robustness, and durability, even under intensive use.

Ergonomics and safety of use

The two push buttons allow for easy operation of the locking levers, even with gloves. Once closed, the levers are protected within their housing to prevent accidental opening. This is exactly the kind of detail that is appreciated in the field where every action must be quick and secure.

FAQ

Is this setup compatible with all Picatinny rails?

Yes, it is designed for standard-sized Weaver and Picatinny rails.

Is the optical adjustment retained after disassembly?

Yes. When the clamping is correctly adjusted, the INNOMOUNT QD system ensures excellent repeatability and allows the point of impact to be found after reassembly.

Which Pulsar models are compatible with this setup?

This mount is compatible with the Pulsar Trail 2, Trail 2 LRF, Digisight Ultra N355, N450, N450 LRF, N455 and N455 LRF.
