A long and rigid Picatinny rail attachment for Blaser and Sauer 505.

The **INNOMOUNT FM Long fixed mount** allows for the installation of a **Picatinny** rail on **Blaser** and **Sauer 505** rifles. Its two-screw torque-controlled tightening system ensures an extremely rigid attachment, ideal for maintaining perfect optic alignment. Its high-strength aluminum and hardened steel construction guarantees robustness and durability.

- **Mounting type:** FM (Fixed Mount)
- **Weapon compatibility:** Blaser and Sauer 505
- **Top interface:** Picatinny rail
- **Version:** Long
- **Construction height:** 20 mm
- **Total length:** 205 mm
- **Weight:** 150 to 180 g depending on the version
- **Fastening:** Two torque-tightening screws
- **Materials:** High-strength aluminum and hardened steel
- **Scalability:** Compatible with Zero Lock upgrades

A permanent link between the weapon and the optics

The **INNOMOUNT FM mount** is designed for users seeking a particularly rigid attachment. Unlike a quick-release system, the mount is secured to the weapon using two clamping screws that are tightened to the recommended torque using a torque wrench. This solution ensures excellent long-term stability.

Long version with integrated Picatinny rail

This **Long** version offers a **total length of 205 mm** , providing greater freedom for positioning a scope, thermal optics, or any other equipment compatible with a **Picatinny rail** . This flexibility is quickly appreciated when it comes to achieving the perfect eye relief.

Compatible with Blaser and Sauer 505

Specifically developed for the **Blaser** and **Sauer 505** platforms, this mount ensures a perfectly fitted interface between the weapon and the Picatinny rail. High-precision machining minimizes mechanical stress and helps maintain the performance of the optical system.

Materials designed to last

The body is made of **high-strength aluminum** to combine rigidity and lightness. The components subjected to clamping forces are made of **hardened steel** , guaranteeing excellent wear resistance and a long lifespan, even under intensive use.

A scalable solution

The mount can be retrofitted with the **Zero Lock** system. This upgrade allows the equipment to be adapted to future needs without replacing the entire mount, a significant advantage for users wishing to upgrade their configuration.

FAQ

Is this mount compatible with all Picatinny optics?

Yes, it is equipped with a standard Picatinny rail allowing the installation of most compatible collars and accessories.

How is it mounted on the weapon?

The assembly is fixed by means of two screws which must be tightened to the recommended torque with a torque wrench in accordance with the manufacturer's instructions.

Can the system evolve towards a Zero Lock?

Yes. The INNOMOUNT FM mount is compatible with an upgrade to the Zero Lock system without a complete replacement of the mount.
