INNOMOUNT QD Weaver/Picatinny Mount 30mm Thermal Tube

The **INNOMOUNT QD Weaver/Picatinny** rail mount is designed for **30mm tube** optics, including thermal and digital models. Its two retractable lever system ensures quick removal, excellent repeatability of the point of impact, and a reliable mounting thanks to its high-strength aluminum and hardened steel construction.

- **Mounting type:** QD (Quick Detach)
- **Compatible rail:** Weaver / Picatinny
- **Necklace diameter:** 30 mm
- **Collar width:** 15 mm
- **Collar spacing:** 103 mm
- **Center-to-center distance of clamping axes:** 110 mm
- **Construction height:** 24 mm
- **Total length:** 173 mm
- **Weight:** 150 to 180 g depending on the version
- **Materials:** High-strength aluminum and hardened steel
- **Locking:** Two retractable levers with safety push buttons

The ideal mount for 30mm tube optics

This **INNOMOUNT QD mount** was developed to accommodate thermal and digital telescopes using a **30mm tube** . Its design ensures perfectly even support for the optics while facilitating installation on a **Weaver** or **Picatinny** rail. In use, the build quality and overall rigidity are immediately apparent.

A true Quick Detach system

The two retractable locking levers allow the lens to be removed or replaced in seconds, without tools. Push buttons prevent accidental opening, and the levers remain integrated into the mount when locked. This design facilitates quick handling while ensuring a secure installation.

Excellent repeatability of the setting

When the clamping force is correctly adjusted, the **INNOMOUNT Quick Detach** system ensures excellent **zero return** . This feature is particularly appreciated by users who switch between different lenses or wish to transport their disassembled equipment without having to readjust it after reassembly.

Compatible with many thermal and digital goggles

This mount is compatible with a wide range of 30mm tube optics, including the **Pulsar Thermion I, II, Pro and LRF** series, **Pulsar Duo DXP50/DXP55** , **Hikmicro Stellar** , **Hikmicro Alpex 4K Lite** , **InfiRay Tube** , **Thermtec Ares** , **Thermtec IBEX** , **Guide TU** , **Night Pearl Marten** , **Lahoux Sight** , **Pard DS35 LRF** , **Nightstalker 4K** , **Pantera** , **Pixfra Pegasus** , **Pixfra Volans** , **Nocpix ACE** , **Nocpix Bolt** and the **Conotech Night Arrow** .

Premium materials for heavy-duty use

The body is machined from **high-strength aluminum** to minimize weight while maintaining high rigidity. Components subjected to mechanical stress are made of **hardened steel** , ensuring excellent wear resistance and remarkable durability. This is precisely the kind of mount designed to provide lasting support for high-end optics.

FAQ

Is this mount compatible with all 30mm tube scopes?

It is designed for 30mm tube optics with a geometry compatible with 103mm ring spacing. It is particularly suitable for many thermal and digital telescopes listed in the product description.

Is the setting retained after disassembly?

Yes. Once the tightening is correctly adjusted, the INNOMOUNT QD system offers excellent repeatability and allows the point of impact to be found after reassembly.

On which rails can it be installed?

This model is compatible with Weaver and Picatinny rails conforming to standard dimensions.
