SKU	Designation	French Law	Length (cm)	Height (cm)	Weight (g)	Colors	MSRP
IM50PA2-10193	BLASER / Pulsar 2 / BH10mm	Vente libre	16.4	1	150	Black	495.00 € incl. tax

The premium quick-mount system for Pulsar optics on Blaser and Sauer 505 rifles.

The **INNOMOUNT QD quick-release mount** is specifically designed for **Pulsar Trail 2** and **Digisight Ultra** optics on **Blaser** and **Sauer 505** rifles. Its two retractable lever system ensures reliable locking, quick tool-free removal, and excellent point-of-impact repeatability thanks to its high-strength aluminum and hardened steel construction.

- **Weapon compatibility:** Blaser and Sauer 505
- **Optical compatibility:** Pulsar Trail 2 / Trail 2 LRF
- **Optical compatibility:** Pulsar Digisight Ultra N355
- **Optical compatibility:** Pulsar Digisight Ultra N450 / N450 LRF
- **Optical compatibility:** Pulsar Digisight Ultra N455 / N455 LRF
- **Mounting type:** QD (Quick Detach)
- **Construction height:** 10 mm
- **Total length:** 164 mm
- **Weight:** 150 to 180 g depending on the version
- **Materials:** High-strength aluminum and hardened steel
- **Locking:** Two retractable levers with safety push buttons

A mount perfectly suited to Blaser and Sauer 505 rifles

Developed specifically for the **Blaser** and **Sauer 505** platforms, this **INNOMOUNT QD mount** ensures a rigid connection between the weapon and the optic. Its precision machining guarantees a perfect fit and helps maintain the overall accuracy, even after numerous disassembly cycles.

A compatibility specifically designed for Pulsar optics

This version is designed to accommodate the **Pulsar Trail 2** , **Trail 2 LRF** , and the various **Digisight Ultra** models (N355, N450, N450 LRF, N455, and N455 LRF). The specific interface ensures optimal lens retention without compromising rigidity.

Quick Detach: speed and repeatability

The **Quick Detach** system uses two retractable levers operated by push buttons. Their design prevents accidental opening while allowing for quick, almost tool-free disassembly. Once the clamping forces are correctly adjusted, the mount offers excellent **zero return** , a particularly valuable advantage when a lens is frequently removed for transport or replaced.

A particularly low profile

With a **height of only 10 mm** , this mount brings the optic closer to the barrel axis. This configuration naturally improves the shooting position and promotes a comfortable sight picture. Furthermore, the overall balance of the weapon remains remarkably good, a detail quickly noticeable in the field.

Materials that meet the requirements

The body is made of **high-strength aluminum** , while the components subjected to mechanical stress are made of **hardened steel** . This combination ensures an excellent balance between lightness, rigidity, and durability, even under intensive use.

FAQ

Is this mount compatible with all Blaser rifles?

It is designed for Blaser rifles compatible with this mounting interface as well as for the Sauer 505. You should check the compatibility of your weapon before installation.

Is the point of impact retained after disassembly?

Yes. When the clamping is correctly adjusted, the INNOMOUNT QD system guarantees excellent repeatability and allows the optical adjustment to be restored after reassembly.

Which Pulsar lenses are compatible?

This mount is compatible with the Pulsar Trail 2, Trail 2 LRF, Digisight Ultra N355, N450, N450 LRF, N455 and N455 LRF.
