- **Material:** Bronzed steel
- **Height:** 8 mm
- **Total length:** 160 mm
- **Dimension A:** 21.84 mm
- **Dimension B:** 63.9 mm
- **Dimension C:** 21.84 mm
- **Weight:** Approximately 135 g
- **Supplied with:** 4 fixing screws N00001

A solid foundation to fully utilize your optics

Mounting a scope or **red dot sight** always begins with a quality base. These **Innomount Picatinny rails** , specifically designed for the **Tikka T1x** , offer a perfectly machined platform that guarantees precise optic alignment. When shooting, this rigidity is immediately noticeable in the stability of the mount and the retention of zeros.

Two versions to meet all needs

This range is offered in two configurations. The **standard version** is perfectly suited for everyday use, whether hunting or sport shooting. The **version with 20 MOA pre-tilt** allows for a greater range of elevation adjustment and is an excellent choice for users who want to fully exploit the capabilities of their scope for medium- to long-range shooting.

One-piece construction in high-strength steel

Made from **bronzed steel** , these rails prioritize robustness and longevity. The steel ensures excellent resistance to mechanical stress and limits deformation over time. This is the kind of detail that is quickly appreciated when looking for a reliable and durable assembly.

Universal compatibility with the Picatinny standard

The **Picatinny profile, conforming to the MIL-STD-1913 standard,** allows for easy installation of most compatible rings, scopes, red dot sights, and accessories. Precision-machined grooves ensure secure locking and excellent mounting repeatability.

A great deal of freedom in positioning

Thanks to its **160 mm** length, the rail allows for precise positioning of the optic according to the desired eye relief and the shooter's physique. This flexibility improves user comfort while promoting a natural and consistent shooting position.

Lasting precision

Innomount's high-quality machining, combined with a one-piece steel design, ensures excellent optical retention and optimal adjustment stability over time. Whether you choose the standard or 20 MOA version, you benefit from a premium mounting solution built to last.

FAQ

What is the difference between the standard version and the 20 MOA version?

The standard version is suitable for most uses. The version with 20 MOA pre-tilt offers an additional elevation adjustment range, particularly useful for medium and long-range shooting.

Are these rails only compatible with the Tikka T1x?

Yes. They are specifically developed for the Tikka T1x rifle to ensure a perfectly fitting assembly.

Are the fixing screws included?

Yes. The rails come with four N00001 fixing screws allowing direct installation on the rifle.
