A ready-to-equip hunting pack, combining a semi-automatic inertia-driven rifle and a 2 MOA red dot sight.

The **Impala Plus Magmatic 12/76 package** combines the **Istanbul Silah** inertia-driven semi-automatic shotgun with **the Microdot Sight MS30 Micro 2 MOA red dot sight** . A 61 cm barrel, a 6-lug rotating bolt, and a compact optic with 11 brightness levels make up this versatile package weighing approximately 3.53 kg. It's a cohesive solution for **rapid target acquisition** while retaining the option of using open sights.

- **Package contents:** Magmatic Impala Plus semi-automatic shotgun + Microdot Sight MS30 Micro red dot sight
- **Rifle brand:** Istanbul Silah
- **Caliber:** 12/76
- **Operation:** semi-automatic by inertia
- **Barrel length:** 61 cm
- **Canon:** chromed inside and out
- **Bore:** 18.7 mm
- **Locking mechanism:** patented 6-lug rotating head
- **Stock:** black and orange synthetic with pistol grip
- **Butt plate:** flexible, anti-recoil
- **Grip:** Gecko Touch non-slip surface with Overmold technology
- **Chokes included:** 1 fixed smoothbore choke, specially designed for slug shooting
- **Finish:** Magmatic black and orange
- **Optics:** Microdot Sight MS30 Micro
- **Reticle:** 2 MOA red dot
- **Lens diameter:** 25 mm
- **Brightness:** 11 adjustable levels
- **Red dot sight mounting:** 21 mm rail, raised and recessed mount
- **Power supply:** CR2032 battery

- **Total weight of the pack:** approximately 3.53 kg

A coherent set of tools to improve responsiveness

In the field, some equipment works best when designed as a complete system. This package combines a **12/76 gauge inertia-driven semi-automatic shotgun** with a compact **2 MOA red dot sight** . The goal is clear: to maintain the shotgun's maneuverability while benefiting from rapid target acquisition. With a total weight of approximately **3.53 kg** , including the optics, the configuration remains well-balanced for hunting.

6-pin rotating inertia and locking system

The heart of the rifle lies in its **semi-automatic inertia-driven mechanism** , prized for its simple design and lightweight construction. The rotating muzzle utilizes a patented 6-lug locking system, while internal steel rails support the mechanism's operation. In practice, this translates into a mechanism designed to offer **reliability, responsiveness, and consistency** over and over again.

61 cm barrel: a manageable configuration

The **61 cm barrel** gives the gun a particularly maneuverable feel. Chrome-plated inside and out, it also features an 18.7 mm bore designed to minimize friction and deformation of the shot. This is exactly the kind of combination that is appreciated when movements need to remain natural and the gun needs to be quickly mounted to the shoulder.

Fixed smooth choke

The barrel is equipped with a smooth, fixed choke, specially designed for slug shooting.

Red dot 2 MOA: quick to find, precise enough for aiming

The **Microdot Sight MS30 Micro** uses a 2 MOA red reticle with 11 brightness levels. The dot remains small enough to avoid unnecessarily obscuring the target area, while its adjustable illumination allows it to adapt to ambient light. This adjustability proves invaluable when conditions change during an outing.

A raised mount that preserves the open sight

One of the interesting features of the MS30 is its **raised, recessed mount for a 21mm rail** . This design allows for the continued use of open sights when the rifle's installation and configuration permit. In other words, the red dot provides an additional aiming option without necessarily sacrificing the iron sights.

Ergonomics and comfort are at the heart of the design

The synthetic pistol grip stock features **Gecko Touch** anti-slip coating with Overmold technology. The soft butt plate contributes to shoulder comfort. Add the instantly recognizable black and orange Magmatic finish, and the whole package displays a distinctive personality without sacrificing functionality.

A pack ready to be configured according to the hunter

Combining the rifle and its optic in a single package avoids starting with a completely bare setup. Naturally, it's still necessary to **mount and adjust the red dot sight** before use, and then periodically check that it's securely in place. Once properly adjusted, the combination provides a well-balanced setup, with a compact optic that doesn't unnecessarily add weight.

FAQ

What does the Impala Plus Magmatic pack with red dot contain?

The pack includes a Magmatic Impala Plus semi-automatic shotgun in 12/76 gauge with a 61 cm barrel, its 5 interchangeable chokes and a Microdot Sight MS30 Micro 2 MOA red dot sight powered by a CR2032 battery.

What is the total weight of the assembly including the red dot?

The total weight of the pack is approximately 3.53 kg. The MS30 Micro red dot sight weighs 129 g, which allows for a relatively manageable setup despite the addition of the optic.

Can the open sight be maintained with the MS30 Micro red dot sight?

The MS30 Micro features a raised, hollowed-out mount designed to allow the use of open sights when the configuration and mounting on the weapon are compatible.
