NOUVEAU

SKU	Designation	French Law	Shots	Length (cm)	Weight (g)	MSRP
GA515N	Guardian Angel 4 PRO avec clip fixation	D	2	12	120	59.00 € incl. tax

The **PIEXON Guardian Angel IV** combines a **professional ergonomic profile** with two independently triggered irritant liquid charges. Its pyrotechnic propulsion propels the liquid at **180 km/h** , up to **4 meters** , without a pressurized reservoir. Its compact 120g size and **integrated mounting clip** facilitate storage and secure attachment to a suitable surface.

- **Ergonomics:** professional profile with textured handle.
- **Announced projection speed:** 180 km/h, or 50 m/s

- **Brand:** PIEXON.
- **Model:** Guardian Angel IV.
- **Colour:** black.
- **Type:** pepper spray defense device.
- **Active substance:** Piexol 400kS.
- **Propulsion:** pyrotechnic charge, without a pressurized tank.
- **Capacity:** two separate loads.
- **Triggering:** two successive presses on the trigger for both charges.
- **Announced projection speed:** 180 km/h, or 50 m/s.
- **Advertised range:** up to 4 m.
- **Size:** 12 × 8.5 × 2.5cm.
- **Loaded weight:** 120 g.
- **Ergonomics:** professional profile with textured handle.
- **Attachment:** integrated clip.
- **Rechargeable:** no.
- **Classification:** category D b).
- **Purchase conditions:** sale unrestricted to adults, without declaration.
- **Marketing area:** Metropolitan France only.

An ergonomic design intended for quick and easy handling

When you need to grab equipment quickly, the shape of the handle is just as important as its size. The **professional ergonomic profile** and textured grips make it easy to position in your hand. At only 2.5 cm thick and weighing just 120 g when loaded, the case remains compact and easy to store in a suitable case.

Two independent loads in the same device

The **two charges of irritant liquid** are activated separately by two successive presses of the trigger. This design allows a second charge to remain after the first activation. The system is **not rechargeable** : once both charges have been used, the device must be replaced.

Pyrotechnic propulsion without loss of storage pressure

The liquid is propelled by a **pyrotechnic charge** , with a claimed speed of 180 km/h and a range of up to 4 meters. Unlike a conventional aerosol, its operation does not rely on a pressurized gas reservoir. This eliminates the risk of gradual pressure loss during storage. The expiration date and storage instructions must still be followed.

An integrated clip to hold the case

The **mounting clip** secures the equipment to a suitable support. It complements the case's flat design and facilitates organization with compatible equipment. For resellers, this integrated mounting system offers a significant advantage, along with ergonomic design and low weight.

A jet directed for outdoor conditions

The patented propulsion system is designed to minimize the impact of wind and rain on liquid projection. These features do not replace the need to consult the instructions before use and to respect the minimum safety distance indicated on the product.

Sale to adults and framework for use

Classified as **category D b)** , this equipment is offered for sale to persons aged 18 and over without registration. Sales of this item are limited to **mainland France** . Carrying and transporting it outside the home are prohibited without a legitimate reason.

FAQ

Can the device be recharged after use?

No. The device contains two separate charges and is not rechargeable. It must be replaced when both charges have been used.

Is the mounting clip included?

Yes, this version has an integrated mounting clip to hold the case on a suitable support.

Does over-the-counter sale permit daily wear?

No. Purchase is accessible to adults, but carrying and transporting outside the home is prohibited without legitimate reason.
